Relevant Experience

Philippine Retirement Authority

IT Intern

Makati City, Metro Manila

February – April 2026

- Deployed and configured Microsoft Office 2016, Microsoft 365, and Visual Studio; developed foundational programming skills in C# and HTML.
- Encoded and maintained company records in SQL Server Management Studio (SSMS) for accurate data management.
- Supported hardware operations through laptop inventory, HDD removal and cloning, system resets, and troubleshooting.
- Resolved employee requests via the company's request portal, addressed Ethernet and login issues, and designed a website tree-mapping structure in Excel.

Municipal Environment and Natural Resources Office

IT Intern

Morong, Rizal

March – April 2023

- Prepared and organized official documents and paperwork to support daily office operations and departmental meetings.
- Participated in and assisted in coordinating a provincial event involving multiple Rizal municipalities.

Projects

Academic Projects

July 2023 - Present

- Developed a Discord chatbot, a Python-based game, and character/visual designs for coursework.
- Completed various IT projects focused on logic, design, and problem-solving, plus ongoing skill-building projects.

UX/UI Design

December 2023 - November 2025

- Designed portfolio websites, landing pages, and web/mobile app UI concepts (Figma), including a quiz app and e-commerce product page, with focus on usability and visual consistency.

Web Development

December 2023 - November 2025

- Built a browser-based photo booth (HTML, CSS, JavaScript) with interactive UI elements and user controls.

Certificates

Foundations of User Experience (UX) Design Coursera

December 2025
